● ABOUT MYSELF

Frontend Architect with strong expertise in frontend development and architecture, focused on building scalable, maintainable and high-quality user interfaces.

While my main specialization is frontend, I also have solid experience working on backend solutions when required, allowing me to contribute to end-to-end product development without losing focus on frontend excellence.

I enjoy working close to product and business stakeholders, translating real needs into thoughtful technical solutions, and I value clean architecture, clear responsibilities and long-term maintainability.

● EDUCATION & TRAINING

15/09/2012 - 23/06/2015 - SEVILLA, SPAIN

HIGHER TECHNICIAN IN MULTIPLATFORM APPLICATION DEVELOPMENT - IES EL MAJUELO

Level in EQF: 5

● WORK EXPERIENCE

01/03/2025 - CURRENT - SEVILLA, SPAIN

FRONTEND ARCHITECT / SENIOR FRONTEND DEVELOPER LA CASITA DE INGLÉS

- Frontend Architect responsible for the overall design, structure and technical direction of a multi-role educational management platform.
- Definition and implementation of the front-end architecture, ensuring scalability, maintainability and code quality across the application.
- End-to-end development covering both frontend and backend layers of the system.
- Frontend development of complex user flows for parents, including registration, child management, enrollments, camps and integrated online payments.
- Backend architecture and development using Node.js, Express and Sequelize, supporting business logic, data persistence and API design.
- Design and implementation of role-based access and permissions for parents, teachers, administrators and center managers.
- Development of administrative tools, dashboards and metrics for operational and business monitoring.
- Technical decision-making in collaboration with product and stakeholders to align business needs with long-term technical solutions.

01/06/2024 - 28/02/2025 - SEVILLA, SPAIN

SENIOR FRONTEND DEVELOPER TAILOR

- Senior Frontend Developer in a startup environment working on an AI-powered personal assistant as the core product.
- Design and development of user-facing features for a web-based AI assistant, focusing on usability,

performance and scalability.

- Implementation of Progressive Web App (PWA) features to improve accessibility and cross-device experience.
- Integration of frontend applications with AI-driven backend services and APIs.
- Configuration and optimization of the frontend build system using Webpack.
- Close collaboration with product, backend and AI teams in a fast-paced startup environment.

01/08/2019 - 30/06/2024 - MADRID, SPAIN

SENIOR FRONTEND DEVELOPER STRATIOBD

- Senior Frontend Developer working on projects for multiple clients such as GP Bullhound, El Corte Inglés, Sanitas, HSBC, REE (Red Eléctrica de España), Banco Santander and Mahou.
- Design and development of frontend solutions to integrate the Stratio platform into client environments.
- Active participation in client-facing projects, adapting solutions to different business and technical requirements.
- Frontend Developer within the internal product team (Governance), contributing to both maintenance tasks and the development of new features.
- Collaboration with multidisciplinary teams to ensure scalable, maintainable and high-quality frontend architectures.

01/03/2017 - 31/08/2019 - MADRID, SPAIN

FRONTEND DEVELOPER VASS

- Development and maintenance of frontend components and services using AngularJS.
- Implementation of unit tests using Jasmine.
- Design and implementation of user interfaces with HTML5, CSS3, LESS and Bootstrap.
- Basic exposure to CI/CD tools such as Jenkins and OpenShift.
- Participation in the development of a pre-approved business loans platform for Banco Santander.
- Collaboration on a Health Insurance Office project for Banco Santander.
- Participation in a Telco project for Telefónica.

01/12/2015 - 31/03/2017 - SEVILLA, SPAIN

FRONTEND DEVELOPER EVERIS

- Front-end development using JavaScript, Node.js, and the AngularJS framework. Task automation with NPM, Bower, and Gulp. Integration with Git and Jenkins.
- User interface design using the Google Material Design suite, HTML5, and CSS3 with the SASS preprocessor.
- The entire project was developed following the Agile Scrum methodology.
- Knowledge of testing tools such as Selenium and Protractor.

● **SKILLS**

Frontend Skills

Front-end web development | HTML | CSS | SASS | JavaScript / TypeScript | Angular | User Interface (UI) development | API integration | Responsive design | Animation expert | CSS Animations | GSAP | Angular Material | Progressive Web Applications (PWA)

Back-end & Full-Stack Skills

Node.js | Server-side programming | Role-based access control | Express.js | Database design and integration | Payment integration | Sequelize | RESTful services development | Authentication and authorization | CryptoJS | Redsys API | Google OAUTH Api | PostgreSQL | Sengrid | MySQL | Swagger

Software Engineering & Architecture

Frontend architecture | Code quality and maintainability | Debugging and troubleshooting | Software and system design | Frontend build tools (Webpack) | Version control (Git) | Technical decision-making | Automated testing / unit testing | CI/CD principles

Transversal Skills

Problem solving | Stakeholder collaboration | Active listening | Team collaboration | Product-oriented mindset
| Agile development | Communication

Best practices

ESLint | Husky | Jasmine | Karma | Cypress

● **LANGUAGE SKILLS**

Mother tongue(s): **SPANISH**

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B1	B2	B1	B1	B1

● **DRIVING LICENCE**

Driving licence: B | 08/06/2023 - 08/06/2033
